

# STACKED SHELVING SYSTEM

**JULIEN DE SMEDT ARCHITECTS ON THE DESIGN** "How to be specific and generic altogether? Shelving systems have a tendency to achieve one concern but never both. We decided to dimension shelving units based on the generic measurements of things to store and display while allowing for them to be combined according to specific needs and desires. The result can be at times a random stack of boxes or a coordinated grid of efficient storage... or both!"

#### COLOURED BACKBOARD

#### DESIGNED BY / YEAR OF DESIGN

Julien De Smedt / 2008

#### ABOUT THE DESIGNER

Copenhagen-based Julien De Smedt is the co-founder of PLOT and an internationally acclaimed architect. He is recognized for his ability to always take a fresh look at things. His works challenge conventions and many have been awarded.

#### CATEGORY

Stackable shelf system, with or without back-board/coloured backboard

#### ENVIRONMENT

Indoor / Free standing or wall mounted

#### COUNTRY OF PRODUCTION

Slovenia

#### PREASSEMBLED

Yes

#### DESCRIPTION

The Stacked system by Julien De Smedt provides a storage solution with infinite potential. Using small clips you can arrange the generic building blocks as you see fit to quickly create shelf systems, room dividers or side tables.

#### PRODUCTION PROCESS

White, grey and dark grey cubes: Every side is cut out of MDF, then assembled, glued together and painted with three layers of PU lacquer.  
Ash cubes: Every side is cut out of MDF with ash veneer, then assembled and glued together.

#### MATERIAL

Stacked cubes: PU lacquered MDF or oak veneer

Stacked clips: Powder coated steel.

#### CLEANING AND CARE

Remove dust from shelves with a soft cloth. When necessary clean with moist cloth. For wood veneer finishes, dry immediately with a soft cloth following wood grains. The wood should not be exposed to excessive heat, direct sunlight or humidity.

#### SPARE PARTS

Each Stacked module comes with two clips. White modules come with two white clips. Oak modules come with two light grey clips. Light Grey modules come with two light grey clips. Grey modules come with two grey clips.

Extra clips are sold in boxes of 5 clips. Choose between black, white, light grey, grey and dusty green.

#### WEIGHT & HEIGHT LIMITS

Max. weight 25 kg per box

Max. 6 boxes on top of each other

Max. 12 kg if mounted on wall.

Modules should always be connected using Stacked Clips or be mounted to a wall to ensure stability of the shelving system.

#### TEST & CERTIFICATIONS

Danish Technological Institute - EN 16122:2012  
Domestic and non-domestic storage furniture - Test method for the determination of strength, durability and stability.
