Welcome to the family!

We are delighted you now have a nanimarquina rug in your life and want to share why your rug is a true work of art.

Each of our rugs, including yours, take between 60 to 90 days to be completed.

The creation process is carried out with the highest quality materials available, in countries with rich traditions and ancestral knowledge such as India, Pakistan and Morocco. By using artisanal techniques, each rug is unique, just like you!

Your new rug provides several advantages:

1 It defines a room, creating different environments while adding warmth and comfort to your home or workspace.

2 It transmits emotions; the beauty, colours, textures and design influence your emotional state.

3 It enhances air quality, acting as a natural filter, minimizing allergic reactions.

4 It provides natural insulation due to the composition of the fibres. It muffles footsteps and absorbs environmental noise.

5 It offers a safe, non-slip surface, ideal for children and elderly.

6 And of course, your new rug will be the star, adding beauty to the room.

1

Vacuum your rug regularly.

2

Clean spills correctly before they dry.

3

When necessary, take your rug to a specialist dry-cleaner.

4

For optimum care, make sure you know the name of your rug to offer proper indications to your dry-cleaner.

Washing Instructions

To ensure proper care of your rug, we recommend the use of a specialized dry-cleaner.

Rugs that can be dry-cleaned:

Antique
Asia
Butterfly

natural - Knitted
natural - Noche
natural - Nomad
natural - Tatami
natural - Vegetal
Rabari
Roses
Spiral
Victoria

Can be dry-cleaned

Care for hand-tufted rugs

en

Hand-tufted rugs are created with a layer of latex to attach the tufts to the base. This layer is hidden beneath the rug's fabric liner. The chemical solvents used in dry-cleaning spoil latex, which will ruin your rug permanently. To enjoy and extend the life of your nanimarquina rug, we recommend that you use the services of a specialist dry-cleaner when necessary and closely follow the indications located on the underside of your rug.

Hand-tufted rugs NOT RECOMMENDED dry-cleaning:

African house
Aros
Bichos y flores
Cal
Chillida - Dibujo tinta 1957
Chillida - Collage 1966
Cuadros 1996
Do-Lo-Rez
Black on white
Extended
Flying Carpet
Folk
Global warming
Kala
Milton - African Pattern
News
Ovo
Rangoli
Stone wool
Sybilla
Topissimo

Observations and Advice

- All of our rugs are handcrafted so there may be **small variations in size**.

- We use **artisanal dye methods** to give colour to our rugs; this may lead to slight chromatic variations.

- Prolonged exposure to **sunlight** may cause colour changes and bleaching effects in your rug.

- **Shading** or **water effects** may appear in cut pile rugs.

- Light will fall differently due to movement or slant direction of the pile, making the rug **colours appear more or less strong and bright**.

- Some rugs are woven with natural materials composed of several interconnected fibres. When these fibres are cut, they can **dislodge lint** due to friction. We recommend frequent vacuuming to remove this lint.

- Cut pile rugs will present loosened threads due to **vacuuming**, please feel free to cut these threads with scissors.

- Contrary to popular trends, you can keep your **rug** out during the **summer months**.

- The initial **colour** of your rug may suffer changes due to the fibres of the rug itself and the amount of exposure to direct sunlight.

There is no absolute guarantee of rug colour in any case or situation.

GUARANTEE

Our products are guaranteed for two years in case of manufacturing fault, unless it is tributable to an improper use or maintenance. Claims will only be accepted with the purchase receipt.
