**CECILIE MANZ ON THE DESIGN** "Storage is important because it is so universal: everybody needs good solutions. The inspiration for the assignment was indeed the everyday storage situation. The design, with its logical construction, parallels to a certain degree an unpretentious Scandinavian lifestyle - one shelf represents one building unit while the length of the tube defines the shelf height. In this simple way one can assemble practical formations that fit individual needs - COMPILE should reflect and accommodate to the life it is a part of."

## PROCESS

Shelves are made from laser cut steel sheets, bent to form, and then coated with high quality powder coating. This coating gives the shelves a matt, abrasion-resistant and fingerprint-insensitive surface.
