

HALFTIME

Care Guide

HAY

HALFTIME

Originally developed in collaboration with COBE for adidas' new Halftime building by COBE in Germany, the Halftime Chair was designed to possess the same robust and flexible properties as the building itself.

The moulded-beech veneer seat and back are riveted directly to the steel tube frame, creating a resilient, stackable chair with a clear expression that perfectly balances lightness, strength and functionality. Motivated by the desire to create an extremely strong and durable chair that can last generations and is versatile enough for a wide range of contexts, Halftime is suited for use in institutions, factories, cafés, and boardrooms.

CAUTION

With a little care you can prolong the life of your furniture. Follow the instructions for the materials of your specific product to make sure that it stays in the best shape for as long as possible.*

- / Always remove stains quickly before they can do any permanent damage to the furniture.
- / Avoid placing the furniture in direct sunlight or near a strong heat source to reduce changes. As wood is a natural material, it will change in colour and will patinate over time.
- / When you move your furniture, make sure you lift it rather than pulling or pushing it to avoid damaging the floor, legs and mountings.

*The information below is only intended as a general guideline. For more information on how to remove specific stains, please enquire where you bought the furniture.

- / Avoid improper use such as sitting on the back, tilting the seats on their back legs, putting your feet on the furniture or standing on it.
- / Be careful not to scratch or damage the surface with sharp objects.
- / Avoid covering the surface partially, for example with cushions or skins, as colour variances may appear.
- / Check the status of the gliders frequently and if worn down, contact your local retailer to buy replacements. The durability of the gliders will depend on the surface that the chair is placed on.
- / Take care not to scratch the chairs against each other when stacking them. Do not move or drag the chairs around when stacked as the weight will damage the legs.

CARE GUIDE

Lacquered or stained wood

Wipe with a clean cloth wrung in water or in a solution of water and a neutral detergent. Remove soap residue immediately using a clean, dry cloth.

If the surface is scratched or appears matt, use a care product suited especially for lacquered or stained wood.

Avoid using detergents containing silicone, as that would seal the stain in and make subsequent repairs more difficult.

Avoid using scouring cream or scouring pads, as they may scratch the surface.

Powder coated steel

Wipe with a clean cloth wrung in water or in a solution of water and a neutral detergent. Remove soap residue immediately using a clean, dry cloth.

Avoid using scouring cream or scouring pads, as they may scratch the surface.

White spirit (mineral spirit) can be used to carefully remove stains from chromed surfaces.
