FOSCARINI

The seduction of a woman's tress was the initial inspiration for the Tress family of lamps. This design-come-true by Foscarini was achieved through the development of a completely original technological process, involving a fiberglass and resin tape woven together with orderly casualness to become the structure and aesthetics of the lamp. Tress changes personality according to its color: it is light and discrete in white, strong and decisive in black, and volcanic and totemic in red, which makes the contrast between the interior and the exterior even more

evident. The wall version, available in two different sizes and occupying minimum space, has been designed to create a magnificent theatrical effect thanks to the way the light is diffused into the surrounding environment and directed towards the ceiling.

Tress, wall technical info

FOSCARINI

Description

Wall lamp with indirect and semi-diffused light. The fibreglass-based composite material diffuser is produced by modelling tape along a mould with an automatic control of the pitch/pattern, which is then liquid coated. Wall mounting plate, housing the lighting technology part, made of aluminium color epoxy powder coated die cast zamak.

Materials compound material on lacquered glass fibre base and coated metal

Colors black, white

Brightness light

semi-diffused and indirect light

Model

Tress large

Weight

net kg: 1,10
gross kg: 2,50

Packaging

vol. m3: 0,045
n. boxes: 2

Bulbs

Halogen 1x120W R7s (78mm)

Certifications

Energy Class

C

Tress small

Weight

net kg: 1,00
gross kg: 2,40

Packaging
