PETER little — the breezy table fan

touch-sensitive control panel
with 4 speed levels

oscillating mode for even
distribution of the airflow

Natural Breeze mode simulates
natural wind conditions

the air inlet filter retains
coarse particles from entering
the appliance

Unobtrusive and dynamic, table fan Peter little can provide a cool breeze wherever it is needed. Peter little has a swing mode, ensuring optimal distribution of cool air. In Natural Breeze mode, he simulates natural wind conditions and switches automatically between the 4 speed levels, creating an atmosphere guaranteed to be pleasantly refreshing! Alternatively, you can choose a level ranging from gentle breeze to strong wind using the touch panel. With his slim stature, Peter little takes up very little space and is ideal even when there is a limited area available. The washable air inlet filter provides reliable protection against dust particles. Peter little is the ideal companion for your bedroom, on your office desk or next to your sofa.
