## GOOD TO KNOW

1. 70 cm / person.
2. Additional transport costs are applicable for products that exceed 7m.
3. Fibre glass reinforced polyester resin material is made with the so-called pultrusion technique. Pultrusion is a non-stop process of fibre glass wires pulled through a bath of polyester resin that harden in a matrix afterwards to get their final shape.

Main advantages of this material are its strength, corrosion-durability and its light weight.
