## DESCRIPTION

## FACTS

## MEASUREMENT

Height: 730 mm
Length: 1250 mm
Width: 348 mm
Table top L X W : $1200 \times 300 \mathrm{~mm}$
Table top thickness: 20 mm
Leg diameter: 14 mm
WEIGHT ITEM
Table top 39 kg , Frame 5 kg
PACKAGING TYPE
Cardboard box, Chipboard, Foam
PACKAGING MEASUREMENT L X W X H CM
Table top: L: $131 \mathrm{~W}: 40 \mathrm{H}: 6,5 \mathrm{CM}$
Frame: L: 126 W: 37 H: 76 CM

Table top

- Delivery note: 5 g

Chipboard: 17000 g

- Foam protector: 30 g
- Strapping: 10 g

Total: 17 kg
Table frame

- Delivery note: 5 g

Cardboard: 3200 g

- Foam protector: 50 g

Total: $3,2 \mathrm{~kg}$
WEIGHT TOTAL:
$78,3 \mathrm{~kg}$

## NUMBER OF PARCELS

3 psc.

MEASUREMENTS

## Black Lacquered Metal Frame

Daily cleaning is done by wiping the frame with a clean dry cloth, or with a cloth hardly wrung in clean water. Dirty surfaces are cleaned with a hardly wrung cloth out of soapy water or in water with added liquid soap. Wipe after with a clean dry cloth

## Marble Top

In order to protect the marble top against penetration of grease and alike, it is advisable to saturate the surface of the marble. We recommend using water with soap flakes or coconut soap. Rinse with semi hot water. Bees wax or a wax based on coconut oil may also be used. Apply the wax with a dry, undyed cloth. When the wax has dried completely in to the marble, polish the marble with a dry undyed cloth.
During the first 14 days of usage, we recommend that this is done 3-4 times. After that, when needed.

Please note that marble may change the expression and color depending on the treatment.

Normal cleaning is done by wiping with a cloth wrong out in hot water with liquid detergent or soapy water.
Marble is a limestone and does therefore not tolerate unfettered acid, such as vinegar, lemon juice, stains of vine, as well as aggressive and acidic cleaning products. Such stains may be impossible to remove. In case of spilling something acidic on the marble top, immediately wash away!

Do not use scouring pads or abrasive cleaners as this may damage the surface
Heat Stress:
Marble can withstand heat in a short period of time, but does not tolerate extremely high temperatures. Glowing hot cookware directly from the stove can pull out the fat from the marble, and this will show as a spot or you risk that the top cracks. Therefore always use a trivet.

Do never pull any sharp or rough objects across the plat.

## ENVIRONMENT

Parts can be separated and sorted for recycling.
