

CRUSHED BOWLS

FURNITURE / LIGHTING / ACCESSORIES

JULIEN DE SMEDT ON THE DESIGN "The Crushed bowls show big-scale architecture applied on small scale objects. The bowls are composed of equilateral triangles and principles we use for big-scale computer modeling. Adding human ergonomics and aesthetics to the equation we have derived a series of vessels that are carefully crushed for everyday use."

PRODUCT FACT SHEET

PROCESS New bone china casted in plaster molds, hand polished and fired twice.

DESIGNED BY / YEAR OF DESIGN Julien de Smedt / 2007
